### **CHAIRMAN'S STATEMENT**

### Key highlights for the six months ended 30 June 2021

This report sets out the results of Argo Group Limited (the "Company") and its subsidiaries (collectively "the Group" or "Argo") covering the six months ended 30 June 2021.

- Revenues US\$1.6 million (six months to 30 June 2020: US\$1.4 million)
- Operating loss US\$0.7 million (six months to 30 June 2020: US\$0.4 million)
- Loss before tax US\$0.2 million (six months to 30 June 2020; profit before tax US\$0.2 million)
- Net assets US\$22.6 million (31 December 2020: US\$22.8 million)

### The Group and its investment objective

Argo's investment objective is to provide investors with absolute returns in the funds that it manages by investing in multi strategy investments in emerging markets.

Argo was listed on the AIM market in November 2008 and has a performance track record dating back to 2000.

### Business and operational review

For the six months ended 30 June 2021 the Group generated revenues of US\$1.6 million (six months to 30 June 2020: US\$1.4 million) with management fees accounting for US\$1.2 million (six months to 30 June 2020: US\$1.2 million). The Group does not accrue for performance fees until they are crystalized at the year end. Unrecognised performance fees at 30 June 2021 amounted to US\$0.9 million (2020: US\$ nil).

Total operating costs for the period, ignoring bad debt provisions, are US\$2.0 million compared to US\$1.6 million for the six months to 30 June 2020. The Group has provided against management fees of US\$0.4 million due from the Designated share class in The Argo Fund ("TAF") (six months to 30 June 2020: US\$0.2 million). In the Directors' view these amounts are fully recoverable however they have concluded that it would only be appropriate to recognise income without provision from these investment management services once a liquidity event occurs in this share class.

Overall, the financial statements show an operating loss for the period of US\$0.7 million (six months to 30 June 2020: US\$0.4 million) and a loss before tax of US\$0.2 million (six months to 30 June 2020: profit before tax of US\$0.2 million). Net loss on investments of US\$0.04 million (six months to 30 June 2020: net profit on investments US\$0.2 million) and interest income of US\$0.5 million (six months to 30 June 2020: US\$0.4 million).

At the period end, the Group had net assets of US\$22.6 million (31 December 2020: US\$22.8 million) and net current assets of US\$8.4 million (31 December 2020: US\$8.8 million) including cash reserves of US\$1.2 million (31 December 2020: US\$0.7 million).

Net assets include investments in The Argo Fund ("TAF") at fair values of US\$7.1 million (31 December 2020: US\$6.8 million)

### CHAIRMAN'S STATEMENT (continued)

### Business and operational review (continued)

At the period end TAF owed the Group total fees of US\$1.1 million (31 December 2020: US\$1.0 million). At 30 June 2021, a provision for US\$0.9 million was made against this amount as the timing of the receipt of the fees from the designated share class in TAF is unknown.

TAF ended the period with Assets under Management ("AUM") at US\$126.7 million (2020: US\$130.4 million). The current level of AUM remains below that required to ensure sustainable profits on a recurring management fee basis in the absence of performance fees. This has necessitated an ongoing review of the Group's cost basis. Nevertheless, the Group has ensured that the operational framework remains intact and that it retains the capacity to manage additional fund inflows as and when they arise.

The average number of permanent employees of the Group for the six months to 30 June 2021 was 19 (30 June 2020: 20).

Following the wild gyrations in financial markets in the first half of 2020 due to Covid-19, the first six months of this year were relatively calm. Business sentiment and equity markets rose as vaccination campaigns got underway and then accelerated in most developed economies, especially in the US, UK and Europe. In addition, many governments also began to ease Covid-related mobility restrictions and activity levels picked up. Economic data in the period has generally been very strong, especially in the US, which posted an annualised growth rate of 6.4% in the first quarter. Although the eurozone economy contracted in the first quarter, indicators point to a strong economic rebound having taken place in Europe. After an estimated contraction of over 3% in 2020, the IMF have upgraded their global growth forecast to 6% in 2021, before moderating in 2022.

However, the reopening of economies and the quick rebound in activity that has followed has fuelled inflation in some countries. In June, the US consumer price index increased by 5.4% year on year, although some of the underlying details suggest that there are temporary factors at play, such as the rise in used car prices. The US Federal Reserve continues to see this inflation increase as transitory but has acknowledged that tapering is being discussed as are two rate hikes sometime in 2023. Notwithstanding the concerns about inflationary pressure,10-year US Treasury yields have dropped by 50 bps from the end of March, falling to 1.25%.

### CHAIRMAN'S STATEMENT (continued) Fund performance (continued)

The Covid recession has had - so far at least - less impact than the 2008 global financial crisis due to an unprecedented policy response in the major economies, combining accommodative monetary measures with the running of large fiscal deficits. However, some emerging market economies have been hit harder and are expected to suffer more significant medium-term losses, for example countries that rely on tourism and for those with limited policy space to respond. Efforts to relieve financial strain on these countries such as the Debt Service Suspension Initiative and the allocation of additional SDR reserves by the IMF together with enhanced vaccine rollout should help emerging markets growth to rebound towards the end of 2021.

The NAV of the Class A shares of the TAF increased by 4.28% in the first half of 2021, compared to a rise of 4.55% in the same period of the previous year; the benchmark JP Morgan EMBI+ bond index fell by 3.12% in the first six months. The fund benefitted from the effect of higher oil prices on several long bond positions but was held back by various macro hedges and the failure of Argentine sovereign bonds to attract a bid post-restructuring. Class A shares issued by TAF continue to be invested in a diversified debt and macro positions which seek to capture alpha through long and short investment in liquid EM corporate and sovereign bonds and FX. In addition, there are other share classes within the TAF master/feeder structure which offer investors exposure to distressed debt portfolio and also special situations where the timeline to investment realisation will be longer.

### Dividends and share purchase programme

The Group did not pay a dividend during the current or prior period. The Directors intend to restart dividend payments as soon as the Group's performance provides a consistent track record of profitability.

### Outlook

The Board remains optimistic about the Group's prospects based on the transactions in the pipeline and the Group's initiatives to increase AUM. A significant increase in AUM is still required to ensure sustainable profits on a recurring management fee basis and the Group is well placed with capacity to absorb such an increase in AUM with negligible impact on operational costs.

Boosting AUM will be Argo's top priority in the next six months. The Group's marketing efforts continue to focus on TAF which has a 20-year track record as well as identifying acquisitions that are earnings enhancing.

Over the longer term, the Board believes there is significant opportunity for growth in assets and profits and remains committed to ensuring the Group's investment management capabilities and resources are appropriate to meet its key objective of achieving a consistent positive investment performance in the emerging markets sector.

### STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

The Directors are responsible for preparing the condensed consolidated interim financial statements in accordance with applicable law and regulations. In addition, the Directors have elected to prepare the condensed consolidated interim financial statements in accordance with International Financial Reporting Standards (IAS 34: Interim Financial Statements).

The condensed consolidated interim financial statements are required to give a true and fair view of the state of affairs of the Group and of the profit or loss of the Group for that period.

In preparing condensed consolidated interim financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with International Financial Reporting Standards; and
- prepare the condensed consolidated interim financial statements on the going concern basis unless it is inappropriate to presume that the Group will continue in business.

The Directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Group and to allow for the preparation of consolidated financial statements. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation governing the preparation and dissemination of financial statements may differ from one jurisdiction to another.

### 2. ACCOUNTING POLICIES

### (a) Basis of preparation

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the Group as at and for the year ended 31 December 2020.

The accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2020.

These condensed consolidated interim financial statements were approved by the Board of Directors on 29 July 2021.

### b) Financial instruments and fair value hierarchy

The following represents the fair value hierarchy of financial instruments measured at fair value in the Condensed Consolidated Statement of Financial Position. The hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement

### 4. SHARE-BASED INCENTIVE PLANS

On 14 March 2011 the Group granted options over 5,900,000 shares to directors and employees under The Argo Group Limited Employee Stock Option Plan. All options are exercisable at 24p per share within 10 years of the grant date.

The fair value of the options granted was measured at the grant date using a Black-Scholes model that takes into account the effect of certain financial assumptions, including the option exercise price, current share price and volatility, dividend yield and the risk-free interest rate. The fair value of the options granted is spread over the vesting period of the scheme and the value is adjusted to reflect the actual number of shares that are expected to vest.

The principal assumptions for valuing the options are:

Exercise price (pence)	24.0
Weighted average share price at grant date (pence)	17.0
Weighted average option life (years)	10.0
Expected volatility (% p.a.)	15.0
Dividend yield (% p.a.)	10.0
Risk-free interest rate (% p.a.)	0.907

The fair value of options granted is recognised as an employee expense with a corresponding increase in equity. The total charge to employee costs in respect of this incentive plan is £nil (30 June 2020: £nil)

The number and weighted average exercise price of the share options during the period is as follows:

	Weighted average exercise price	No. of share options
Outstanding at beginning of period	24.0p	4,115,000
Granted during the period	:=:	=
Forfeited during the period	24.0p	(3,865,000)
Outstanding at end of period	24.0p	250,000
Exercisable at end of period	24.0p	250,000

The options outstanding at 30 June 2021 have an exercise price of 24p and a weighted average contractual life of 5.6 years. Outstanding share options are contingent upon the option holder remaining an employee of the Group.

No share options were issued during the period.
